

The Almost Complete Reference of Nidoran Family Characters

Model Sheets for every Nido from 1999 to 2010... except the really unimportant ones.

NIDORAN Body Type - Average Spots - 6

Two eyelashes per eye.

Nidoran uses the Nidoran Female base construction. Her face is a bit different. A little less "generic." "Pikemon" and a bit more "tender female".

All married characters wear rings, where possible, on the left hand.

A big smile pushes cheeks up, effectively pushing the whiskers and eyes up as well.

Being a cartoon character her two claws can function like fingers. Standard variations include thumb-index, index-ring, or mitten-like, all interchangeable.

Four out of six spots are on her left side, the left arm spot being one of her tell-tale features.

Eyebrows aren't a permanent feature, but are used when necessary to add expressional depth.

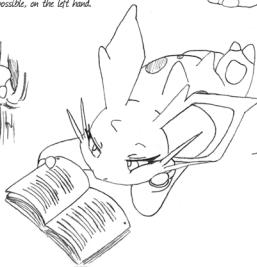

Even when bipedal, Nidoran should retain roundness. Because her legs are extended, she becomes less "busted" than when on her haunches.

Stubby! Always stubby! Nidos don't have long legs!

For some reason her thighs disappear when quadrupedal. Blame official standards...

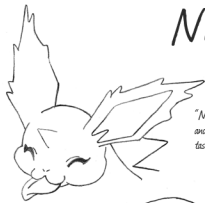

Generally speaking, Pike Island characters have a range of emotions, expressions, and engage in (even mundane) activities that make them a lot more relatable (even if forgotten). Make them come alive.

Feelings and emotions that aren't absolutely stark are very important to P1 characters. Try to feel what they're feeling.

Poor Nidoran doesn't know how to feel right now after hearing something unsettling.

NIDORAN Body Type - Average Spots - 5

"Not only do flowers look and smell pretty, but they taste pretty good too!"

The spikes on Nidoran's back seem to collapse a bit when wearing clothes, as not to tear holes in them.

Nidoran uses the Nidoran Male base construction. He appears happier than the stock art for Nidoran Male.

Identifiable eyelash when eyes are squinted shut.

"I... I'm not afraid...
... am I?"

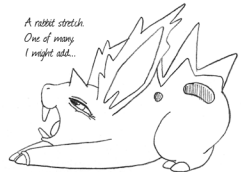

Sometimes, an immediate, split second reaction is still worth doing.

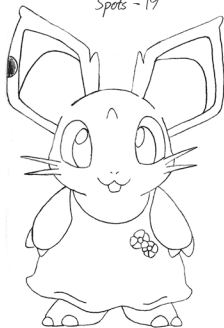

His right arm has a triangular spot in the middle, this is one way to identify him.

A rabbit stretch.
One of many,
I might add...

"Paralyzed with fear" is a phrase that associates well with rabbits. Nidoran falls victim to natural habit. Fortunately, he has a defense mechanism all over.

Dot Body - Average
Spots - 19

Needles Body - Pudgy
Spots - 3

Needles only has 3 points on his ears for now.

Diana Body - Pudgy
Spots - 8

Remember that babies ear points are rounded and softer.

Nina Body - Infant
Spots - 3

Nina's ears are big and floppy.

Chaud Body - Infant
Spots - 7

Chaud also has oversized ears that he'll grow into. His ear points have a different pattern as well. He also appears perpetually cranky.

Spots

The position of Dot's back spikes is higher than normal.

Dot's right side

Needles hasn't grown in the outer row of spots yet.

Nina only has these three spots on her right thigh.

How to sit like a quadruped while wearing clothes.

His shirt allows two of his spikes through.

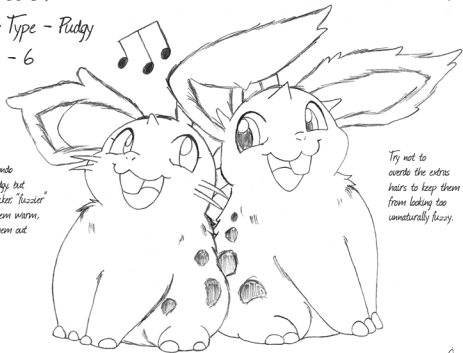

In construction, Diana's body isn't much bigger than her head. Same can be applied to all Nido babies one year and younger.

MELODY

Body Type - Pudgy
Spots - 6

Melody and Rondo aren't really pudgy but they have a thicker, "fuzzier" coat to keep them warm, which puffs them out externally.

Try not to overdo the extras hairs to keep them from looking too unattractually fuzzy.

RONDO Body Type - Pudgy Spots - 8

SARAH

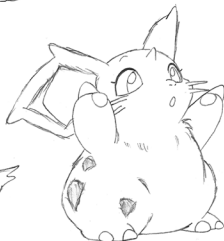

Body Type - Fit
Spots - 6

Sarah's spots are identical on each side, in a typical Nideran pattern (one on back, two on thigh)

The Snow Nideran are so huggable.

Hopefully they're not too poisonous...

ANGELINA

Body Type - Average

Spots - 8

She wears two earrings on each ear. The smaller earring is furthest away from the head.

Angelina has one thick eyelash on each eye, thanks in part to her makeup.

Three thin eyelashes on each eye.

Eyebrows are always present on Angelina.

Here's the general idea for Angelina's hair. It's not static, however, and can flow when necessary.

Angelina has three whiskers, with the middle one about a third of the size.

Even when they lost it all, they still kept their rings.

Gerald Faurmsworth

Body Type - Average

Spots - 6

Martha Faurmsworth

Body Type - Average

Spots - 8

Roughly Gerald's ear.

Martha and Gerald's rings have a stone on top of them.

Ah, yes, I remember the days of my youth quite vividly yes, quite vividly.

Example of the raps the Faurmsworths had to wear.

More clothes over haunches. Why do animals wear clothes if they're still gonna be animals?

NIDORINA

Nidorina has a "soft" horn. It's smooth and rounded and doesn't stick out too far from her head.

She has a great big spot on her hip, and a smaller one on her leg.

Body Type - Pluggy (technically Voluptuous*) Spots - 4

The trick to plumping Rina up a bit is to construct a basic Nidorina with a protruding bean shape, facing her backside.

Not a word...

The amount of pearls on her necklace is arbitrary.
Like the Faunsworths, her ring has a stone.

Don't forget she wears reading glasses!

This is how Nidorina's mouth should look. Her evolution was abnormal.

DO NOT give Nidorina the common beaked mouth! This is incorrect!

The overbite or "avine Maowth" mouth is also acceptable.

...which makes these types of mouth expressions perfectly legal.

Traditionally when Nidorina's head is tilted downward, her mouth is just one big curve...

...though technically this is also correct.

Nidorina is tricky. Do not make her thinner than average!

Do not make her fatter than average! Use the bean method to widen her thighs to get the right effect.

Nidorina has two eyelashes on each eye. By default, her eyes are best described as calm.

Now you see why her kids are a little thick, too.

Nidorina loves to eat, but never gains extra weight. Interesting.

*Technically the addition of manmories is legal for this character, seeing as it was part of the series. However, being based on the idea of a voluptuous woman, she's a bit too much. It's better to ignore them or keep them behind clothes. It's disturbing otherwise.

Nidorina's over eagerness to gain Nidorino's affection is just part of her character.

This is why she's self conscious on the beach...

EEEE! Don't look at me! Go away!

NIDORINA Body Type - Fit Spots - 6

Construct the head and face without the bow and hair first. Then lay in the hair and bow on top.

A quick way to do the hair.

Her ears are a bit different than standard.

Her ears

Common Nidorina's

Nidorina tends to have big, bright eyes as default.

Her mouth is a smoother and smaller version of a common Nidorina's. Do not add ridges.

Nidorina still has the charm of a little girl, and may act like one...

...but in other situations, she tends to behave much more like her age.

Either way Nidorina's not ashamed to be a female, even if she does hang out with guys.

If she decides to wear her bow, she wears it near her right ear.

Nidorina has one combined eyelash on both eyes.

Her spots are three circles on each thigh that go down from biggest to smallest.

Despite being fit, she should still be stubby and a bit wide all around. You can't help being what you are...

Nidorina's white underbelly makes a heart like shape at her chest.

Nidorina's body makes a 'B' in construction.

Devious thoughts... Nidorina likes to josh people around.

If a straight on approach is needed for the hair say while turning, this is how it would look.

Her eyelids are naturally a darker hue than the rest of her face.

Like all females, no matter the eyelash type they have while normal, when shocked, distressed, horrified, or the like, the eyelashes spread about.

CHARLOTTE Body Type - Average Spots - None

Deadpan and slouched,
classic Charlotte.

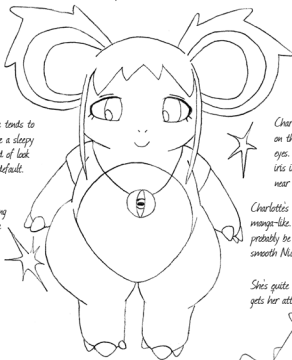

Charlotte starts with common Nidorina ears, but they become round and circular after the third point.

Charlotte is not a pure, natural, and tangible creature. Being closer to embodied energy, she can easily break herself down into this state*. It doesn't hurt her nor affect her negatively.

That said, it's still unnerding to see it happen.

She tends to have a sleepy kind of look as default.

Charlotte has eyelashes on the bottom of her eyes. The glare in her iris is also located near the bottom.

Charlotte's mouth is, artistically manga-like. In real life, it would probably be a really small and very smooth Nidorina mouth.

Without the All Seeing Eye, Charlotte will eventually become a less cute "monster". Actually, this is an effect of her structure breaking down. She will tear apart and ultimately melt away in a chaotic frenzy.

She is ALWAYS wearing the All Seeing Eye. She can live for a period without it, but slowly she'll go into a seizure. It is not an accessory.

She's quite curious, and just about anything gets her attention.

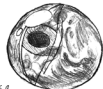

She's also kind of snaggle-toothed, having a fang grown just left (her right) of center in her mouth.

When Charlotte attempts a big smile, it often comes out crooked. Just another factor into Charlotte's imperfections.

Charlotte does NOT have memories, nor will she ever get them. She has no reproductive system, so don't draw them.

The idea behind the All Seeing Eye is that it appears to be a glass like orb with what looks like an eye incised inside it. There is always a swirling mist flowing inside. Granted, this is just a technical matter.

*Charlotte cannot shape-shift. She can basically vaporize herself and then reconstruct herself as a teleportation method.

Carmela as she appears stripped down to the essentials.

CARMELA Body Type - Curvy/Bulky Spots - None

The first protrusion on her ears are painted, long and thinner than average. It then follows into another three protrusions.

Hair should be added after everything else is constructed.

Hips/thighs much thicker than average.

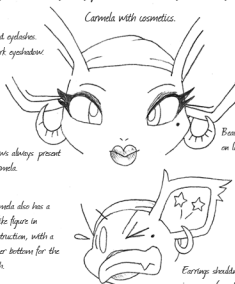

Even with this figure, she's still a wide and stumpy Midorina.

Yeh, didn't be fo' estudyin' porpises only!

Top of white underbelly is apple like, or makes a white 'm'.

Thicker lips and eyelashes. Also wears dark eyeshadow

Carmela with cosmetics.

Fangs never show on closed mouth

Beady mark on left cheek.

Sort of slanted eyes.

Earrings shouldn't pierce inner ear (so stop doing it that way!)

Has two eyelashes on each eye.

Carmela's hair goes to her waist.

Carmela's spines are hooked and painted.

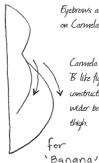

Legs and arms are noticeably thicker than average seeing as she bulks up for street fights and such.

She paints both her fingers and toes with a near black polish.

Carmela doesn't retain a lot of animal behaviors, especially after evolution. She can squat but you'll hardly ever see her on her haunches.

Carmela also has a 'B' like figure in construction, with a wider bottom for the thigh.

for 'Banana'

The Defence Surf on her head somehow conceals all her hair.

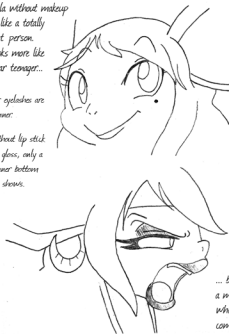

Back of Carmela

Dashed line denotes how hair flows down.

... but she appears as a menacing looking thing when the cosmetics come on.

Carmela without makeup seems like a totally different person. She looks more like a regular teenager...

Her eyelashes are thinner.

Without lip stick and gloss, only a thinner bottom lip shows.

LISA BERKLEY Body - Average
Spots - 6

Insert game logo/reference,
comic book reference or
something geeky here.

Back of head,
angled.

Spot pattern on
both legs.

REILINA Body - Fit
Spots - 6

Reilina's hair comes
down over her left
eye, no matter what
angle.

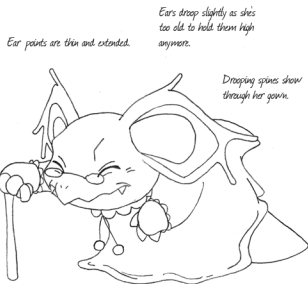

Reilina has a pattern
similar to All Niderina,
except the spots are shaped
like diamonds (roughly).

Note the ears.

AGNES Body - Average
Spots - Unknown

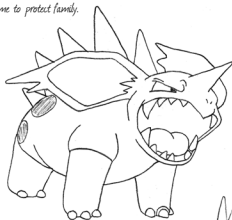

Ears droop slightly as she's
too old to hold them high
anymore.

Drooping spines show
through her gown.

NIDORINO Body - Just Under Average Spots - 4

Like a dog's face changes when angry, Nidorino becomes vicious when it's time to protect family.

Sometimes, Nidorino just doesn't care...

Nidorino's mouth is smoothed compared to average, and smaller as well.

If Nidorino isn't cute-like, you're drawing him wrong.

His inner ear "fuzz" consists of three strands. The middle is larger than the outer two.

Remember This--
Nidorino's face looks more like a cuter Nidorina than an average Nidorino.

Nidorino's body is marginally slimmer and less bulky than an average Nidorino.

Nidorino, bipedal.

In the old days, Nidorino tended to be evasive whenever Nidorina tried to advance on him. There's always some excuse.

Currently, though, Nidorino got past his reservations and decided if you can't beat 'em, join 'em. Keep in mind that both spouses are decidedly attractive for their species.

Why did I get married...?

I'm so sorry... Nidorino should appear approachable.

NIDORINO Body - Average Spots - 7

Because Nidorino is a comedic (in a tragic way) character he can go off model much more often.

Five of the seven spots are on Nidorino's right side.

Only two strands of "ear fuzz" for Nidorino, the top most being larger.

This Nidorino's face resembles an average Nidorina more than an average Nidorino.

Nidorino's "glasses" are merely presentational. The lenses are plastic.

An average face to base all others from.

"Kinyōgo wa Chōjo ni yasheyo ni..."

More exaggerations.

Ideally, when Nidorino's legs and thighs look like in construction when tipped.

Um, he's a few cards short of a deck...

Unlike older art, let's remember to keep Nidorino stocky.

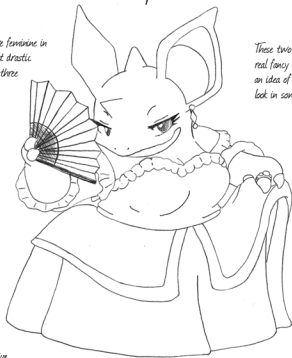

You can use Nidorino as a dummy for experimental expressions or postures. Still, use references. Life provides the funny.

NIDOQUEEN

Body Type - Average
Spots - None

Nidoqueen is a bit more feminine in appearance, but without drastic change. Nidoqueen has three eyelashes on each eye.

These two like to dress up real fancy like. These are just an idea of how they might look in some formal attire.

NIDOKING

Body Type - Average
Spots - None

Nidoking is light spirited. Without too much alteration to the generic Nidoking, try to make him look a bit more calm and friendly.

The wedding rings have stones all around. Nidoqueen has 3 extra stones on the top of her ring.

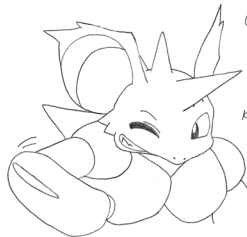

Keep Nidoqueen lively and give her some character in her actions.

Nidoqueen wears crystal earrings, even if not dressed otherwise.

Nidoqueen's chest plates are altered from the average design by drawing in large balls in construction. The placement should make sense.

Keep Nidoking lively too.

NIDOQUEEN Body - A Little Fit
Spots - None

Nidoqueen has two eyelashes on each eye. Her mouth is also smaller than average.

Glasses make everyone sophisticated. These are just fancier reading glasses.

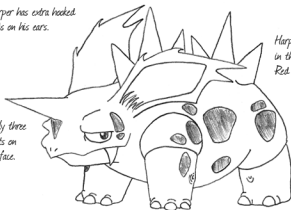

KENT BERKLEY Body - A Little Bulky
Spots - None

Mr. Berkley has more upper body mass. Remember this before you lay over it with the shirt.

HARPER Body - Bulky
Spots - 19

Harper has extra hooked ends on his ears.

Only three spots on his face.

Harper has six back spines in the same design as Sugimori's Red and Green Nidorina.

These spots are mirrored on his other side.

Mr. Berkley's face is a bit different than average. He has a bit more chin, as well.

Whatever these are, he has three of them instead of the average two.

This Nidoqueen's body is constructed like a pear and a B, like the fit Nidorina design.

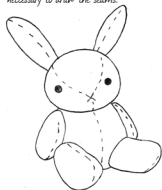

Refer to the basic Nido guide for poses and actions. Harper is pretty much an average Nidorina.

The number of hairs or whatever in Harper's ear is arbitrary, but should be abundant.

RIRI

Body Type - Chibi
Spots - None

Bunny Riri's doll, up close with the stitching seams. It is not necessary to draw the seams.

Each have large eyes and a blush on their cheeks. Riri has two eyelashes per eye.

Riri and Roy are similar to Charmander or a shell-less Squirrel but with ears (and a horn for Roy).

Also, the Nido babies structure is similar to Riri and Roy.

Riri's inner ear doesn't consist of two parts like a non-chibi Nidorina.

Riri only has two spikes instead of four.

REY

Body Type - Chibi
Spots - None

As if their skeletons were made of rubber, these chibis are pliable and can stretch or contort a bit. It adds to the overall cartoonish nature.

Their body is about 1/2 heads long. They're actually more "stumpy" than "chibi", but they're also smaller than most average Pokemon.

There's a foot, but no toes.

Another one bites the dust in chibi town...

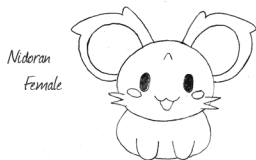

Roy has a line of three small spikes.

CHIBI-CHIBIES Body Type - Chibi/Generic Spots - Optional

A Chibi-Chibi is an extremely simplified generic interpretation of a Pokemon (or possibly anything). There are no other guidelines, style them the way you want to. Below are average Nido examples of Chibi-Chibies.

Nidoran
Female

Nidoran
Male

Nidoqueen

Nidorina

Nidorina

Nidoqueen

A Chibi-Chibi Nidorina compared to Rins. Obviously two different approaches.
Chibi-Chibies are smaller, too.

...and here's even MORE Chibi-Chibies!
